

Science is everywhere in the fall! The weather is cooler and it's a great time for little scientists to get out and explore the world around them.

Pumpkin Learning

Use the back side of this page to use to record your child's predictions and estimations about the different properties of the pumpkin and then test to see if the predictions were right.

1. Does it sink or float?
2. How many pumpkins high are you?
3. How far will it roll?
4. How much does it weigh?

Each time you test a pumpkin property, help your child record the observations on the investigation sheet.

Pumpkin Investigations

Making predictions and estimating the answers gets kids actively involved in the learning and makes it easier for their brains to retain and comprehend new information. It's a good problem solving skill to practice whenever you can.

Lots of people have been playing and learning with pumpkins lately!
